ROOM 2
WEDNESDAY, JUNE 15, 2016

Section 2:   Complex Analysis, Real Analysis and Functional Analysis
Chair: Nikola Tuneski

18:20 – 18:40	**Ekrem (Aljimi) Alimi, Elida Hoxha, Florim Hyseni, Xhvet Thaqi:** Approximation for periodic functions via weighted A-statistical convergence for sequences of positive linear operators
18:40 – 19:00	**Anila Duka, Ndrçim Sadikaj:** On quasiconformal selfmappings of the unit disk and the unit ball
19:00 – 19:20	**Teodor Bylboacă:** On the theory of differential subordination and superordination

20:00 – 21:00   Dinner

21:00 –   COCKTAIL, Hotel Metropol

ROOM 2
THURSDAY, JUNE 16, 2016

Section 2: Complex Analysis, Real Analysis and Functional Analysis

Chair: Dilek Söymelez

10:50 – 11:10	**Stela Çeno, Gladiola Tigno:** Asymmetric inner product and asymmetric quasi norm function
11:10 – 11:30	**Katerina Anevska, Risto Malcheski:** Remark about characterization of 2-inner product
11:30 – 11:50	**Paul Gauthier:** Approximation by: Riemann zeta-function; polynomials (rational functions) with constrained zeros (poles)
11:50 – 12:10	**Martin Lukareski, Samoil Malcheski:** Sequentially convergent mappings and common fixed points of mappings in 2-Banach space

12:10 – 12:30   Coffee break

Section 2: Complex Analysis, Real Analysis and Functional Analysis

Chair: Martin Lukareski

12:30 – 12:50	**Aleksa Malcheski, Alit Ibraimi, Risto Malcheski:** Extending Kannan and Chatterjea theorems in 2-Banach spaces by using sequentially convergent mappings
12:50 – 13:10	**Milutin Obradović:** Recent results on a class of univalent functions
13:10 – 13:30	**Ledia Subashi:** Properties of a tiling generated by the golden ratio

13:30 – 15:30   Lunch

ROOM 2
THURSDAY, JUNE 16, 2016

Section 2: Complex Analysis, Real Analysis and Functional Analysis

Chair: Paul Gauthier

17:20 – 17:40	**Samoil Malcheski, Katerina Anevska, Risto Malcheski:** A characterization of strictly convex 2-normed space
17:40 – 18:00	**Zerrin Önder, Ümit Totur, Íbrahim Çanak:** Statistical extensions of some classical Tauberian theorems for Cesàro summability of triple sequences
18:00 – 18:20	**Dilek Söymelez:** On modified Bleimann, Butzer and Hahn approximation operators

18:00 – 18:20   Coffee break

Section 2: Complex Analysis, Real Analysis and Functional Analysis

Chair: Teodor Bylboacă

18:40 – 19:00	**Samoil Malcheski:** Some characterizations of 2-inner product
19:00 – 19:20	**Nikola Tuneski, :** Some results about a filtration of starlike functions
19:20 – 19:40	**Kastriot Zoto, Ilir Vardhami:** Common fixed points in b-dislocated metric spaces using (E.A) property
19:40 – 20:00	**Behar Baxhaku, Fevzi Berisha:** Statistical approximation properties of bivariate extension of q-Lupa-Stancu operators
20:00 – 20:20	**Delčo Leškoski**

ROOM 2
FRIDAY, JUNE 17, 2016

Seminar 1

9:00 – 10:40	Enhancing mathematical education through combinatorics Speaker: **Sava Grozdev**

10:40 – 11:00   Coffee break

Seminar 1

11:00 – 12:40	Enhancing mathematical education through combinatorics Speaker: **Sava Grozdev**

12:40 – 14:00   Lunch

14:15 – 19:30   EXCURSION

20:00 – 23:00   FAREWELL DINNER
